About this collection

In our collection Heart for Earth we have fabrics made taking into account sustainability in various aspects as much as possible. For this reason we have certifications regarding the origin and processing of our fabrics.

In Heart for Earth we also thought about Herbarium Tincturae. Herbarium Tincturae is a true philosophy of life and a radical change from the ordinary industrial approach.

Organic fabrics are wisely dyed with an old decoction technique and, to reduce the waste, only non-edible parts are used.

Furthermore we can also find our Ciuta and Elastico projects.

A NEW LOOK FOR OUR

Tinti in pezza

Combined with the wardrobe concept, in this edition we have completely renewed the concept of piece-dyed products, presenting them in our new “Cassetto” (drawers) with a more sophisticated and practical packaging, which allows agents to take them with them by rolling them up and closing them with a lace.
